Tongue and Groove Pine (see Lumber)

Beautiful & durable horse stalls constructed with tongue & groove southern yellow pine 2x6 or 2x8 lumber fronts and partitions. All wood is surfaced on 4 sides for a smooth finish. Use treated lumber for the bottom two rows to resist rot and decay from contact with ground and manure. Yellow Pine is a beautiful wood that provides unequaled strength and accepts finishes well. The tongue and groove design provides a unified construction for strength and durability. Combine this with our powder-coated grilles and accessories for a truly finished appearance.
